#### **NGA Awards Human Capital Management Contract to Accenture National Security Services LLC (“Accenture”)**

**BETHESDA, Md.**—The National Geospatial-Intelligence Agency (NGA) has awarded a multiple-year, \$69 million Human Capital Management (HCM) contract to Accenture National Security Services LLC (“Accenture”) that continues the Agency’s commitment to expand government and industry interactions related to geospatial intelligence.

The Human Capital Management (HCM) contract covers a 5-year period (a base year plus four one-year options). It supports NGA's Human Development Directorate by providing a holistic approach, encapsulating the end-to-end processes involved with managing people resources in the organization, from strategic work force planning support services to the day to day execution of transactional human capital functions such as recruitment and retirement processing.

The contract is part of NGA’s overall long-term Human Development Technology and Services (HDT&S) initiative. NGA competitively awarded a Learning Management Services contract to Lockheed Martin in June and anticipates award of several small business set-aside contracts for additional Human Development related services under the HDT&S initiative. These contracts will be announced on an individual basis after each award.

The HCM efforts will primarily be performed in the greater Washington, D.C. and St. Louis, Mo., areas. NGA Headquarters in Bethesda, Md., is the contracting activity.

NGA is a Department of Defense combat support agency and a member of the National Intelligence Community. The Agency’s mission is to provide timely, relevant and accurate geospatial intelligence in support of our national security. The term “geospatial intelligence” means the exploitation and analysis of imagery and geospatial information to describe, assess and visually depict physical features and geographically referenced activities on the earth. Geospatial intelligence consists of imagery, imagery intelligence, and geospatial information.

Headquartered in Bethesda, Md., NGA has major facilities in the Washington, D.C., Northern Virginia and St. Louis, Mo., areas with NGA support teams worldwide. Visit our Web site at <http://www.nga.mil>.
